

Designation: IAM Analyst

Relevant Experience: 2.5 - 3 Years

Work From Office Opportunity

Evening Shift: 6PM to 2.30 AM

Required Skills: -

Core Skills:

- RESTful API Knowledge - API calls, API responses, API documentation.
- Programming Languages - Python, PowerShell, C#, Java (Java with Selenium or Python with Selenium will work)
- Automation Experience – ServiceNow API, Selenium
- Version Control – GIT
- Testing - Integration Testing, Functional Testing, Regression Testing
- In software development, proficiency in Python, PowerShell, and C#,
- Testing and version control.
- Automation using the ServiceNow API, Selenium, and SSO.

We need someone who has experience building small applications by themselves or automating business processes without assistance from other teams. A lot of the work will be developing scripts using Selenium and Python to automate access provisioning in third-party applications based on the ticket data received from customer ServiceNow requests.

Nice to have:

- Identity Management Concepts - Identity Providers (IdP), Service Providers (SP), Single Sign-On (SSO), Security Assertion Markup Language (SAML), OAuth2, OpenID Connect (OIDC).
- Python testing frameworks such as unittest, pytest
- Azure DevOps – deploying Python or C# apps in Azure.
- Code reviews – experience reviewing other developer's code in an enterprise environment
